

Adding Video from Youtube

Youtube is a video hosting web service. You can upload your own videos on youtube and then link them to your fundraising page OR if you would like to link to another video with local kids there was one created by a local parent as a short tribute to our kids and community.

1. Once you are in Firstgiving (www.firstgiving.com) you will find the following page where you can edit your fundraising page.
2. Click to “add video from YouTube”

3. You will then need to post the URL from Youtube for the video you want to use.
4. To use the local tribute you would need to enter <http://www.youtube.com/watch?v=5KZKog-tWt8>
5. Click to save/change the video .
6. Look at your fundraising page. It should now have the YouTube video.
7. If you want to use this feature and are having a problems feel free to contact Shawn Neff at saneff@cox.net. I will try to help you through the process.
