

## THE ANSWER:

### The TRUTH about flu shots and vaccinations!

## THE QUESTION:

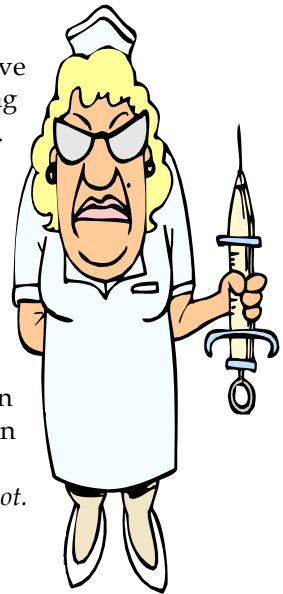

### Are flu shots and vaccines necessary?

In one Hour of Power on Saturday April 10<sup>th</sup> at Life Source Chiropractic (15475 Ruggles St., Omaha, NE (Just N. of 156<sup>th</sup> and Maple)) from 10:00-12:00pm, renowned speaker Dr. Jason Wiese will reveal the TRUTH about vaccinations and flu shots!

Don't let the bliss of ignorance prevent you from learning the reality of vaccinations and flu shots as the Astounding Revelations will help you make an educated decision for you and your family. Call 402-934-4220 and reserve your seat TODAY!

#### Four Reasons To Question Flu Shots and Vaccines

1. According to Hugh Fudenberg, MD, the world's leading immunogenicist, if an individual has five consecutive flue shots between 1970 and 1980 (the years that were studied), his or her chance of getting Alzheimer's disease is ten times higher than if they had one, two or no shots. When asked why, Dr. Fudenberg stated that it was due to the mercury and aluminum that is in every flu shot (and most children's immunizations). *"The gradual mercury and aluminum buildup in the brain causes cognitive dysfunction."* John's Hopkin's November 1998. Despite this fact some Doctors now recommend flu shots for kids Doctors say: *"Healthy young children might benefit from flu shots"* -USA TODAY
2. Vaccine constituents include Ethylene glycol (antifreeze); Phenol, also known as carbolic acid (this is used as a disinfectant, dye); Formaldehyde, a known cancer-causing agent; Aluminum, which is associated with Alzheimer's disease and seizures and also cancer producing in laboratory mice (additive used to cause antibody response); Thimerosal (a mercury disinfectant/preservative) can result in brain injury and autoimmune disease; Neomycin and Streptomycin (used as antibiotics) cause allergic reaction in some people and lowered immunity in everyone.
3. The Mayo Clinic doesn't recommend that all children get flu shots: *"Not all children need an annual flu shot. Most doctors recommend an annual flu shot for children who are at high risk."* -Mayo Clinic
4. Do you want her sticking you with a needle? →
